

Responsibilities

RAIL SAFETY ADVISER

Advise management on the preparation, promulgation and review of a company safety policy for health, safety and welfare, including the organisation and arrangements for carrying out the Policy.

Give advice to management as requested on:

- Risk assessments and legal requirements affecting health, safety and welfare.
- Prevention of injury and damage.
- Provision, selection and use of protective clothing and equipment.
- New working methods, equipment or materials which could reduce risks.
- Proposed changes in legislation.
- Potential hazards on new sites before work starts, health and safety factors affecting the selection of plant and equipment, contractors and so on.
- Development of Health and Safety Plans.
- Carry out checks of inspections of sites and workplaces if required to determine whether work is being carried out in accordance with company policy, method statements and the relevant statutory provisions.

Carry out investigations of serious accidents in accordance with company policy and prepare and provide accident reports.

Provide advice on training requirements where required.

Endeavour to establish at all levels within the company an understanding that compliance with the regulations and prevention of injury and damage is a profitable and essential integral part of business and operational efficiency.

Review and update rail standards & general legislation as required.

Carry out management system audits on a six monthly or annual basis.

Shall be chartered MIOSH or similar qualified

Shall have at least five years' experience working on the rail.
